MCR-GeoChem v1.0.0: harmonized whole-rock and mineral geochemistry of the Midcontinent Rift (Michigan, Minnesota, Wisconsin)

Show affiliations

An open, versioned, quality-flagged compilation of 3,524 samples and 168,748 geochemical determinations from 1.1-billion-year-old Midcontinent Rift (Keweenawan) intrusions, lavas, and rift sediments in Michigan (1,057), Minnesota (1,695), and Wisconsin (772). Units, censored values, methods, and sample-type labels are harmonized; each value keeps its original form. Includes the codebook, provenance log (sources, URLs, access dates, checksums, row counts, licenses), QA report, and figures.
